

MEMORANDUM

14 MAR 1959

MEMORANDUM FOR MAJOR GENERAL FURK

SUBJECT: Reorientation WS 117L Program IIA

1. Recent decisions by DOD have resulted in a reorientation of the WS 117L Program IIA, which utilizes Thor boosters for the early phase of WS 117L. It was realized that Lockheed, General Electric, and Fairchild may have incurred costs prior to notification of the reorientation of the program.

2. Notification of the reorientation was transmitted by teletype to Lockheed on 10 March 1958. A copy of that teletype is inclosed. General Schriever has reviewed the entire matter and wishes that Lockheed, General Electric, and Fairchild be reimbursed for costs incurred up to and including the date of teletype notification.
